The background of the slide is a dense field of 3D-rendered numbers in various shades of blue and white. The numbers are scattered and appear to be floating or rising from a surface, creating a sense of depth and movement. The lighting is soft, highlighting the three-dimensional quality of the digits.

Women In Statistics

Darleen Ziege

Hypatia

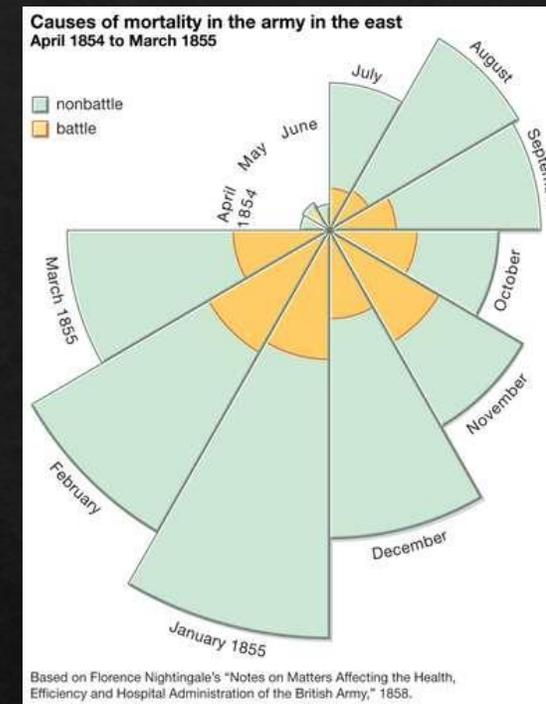

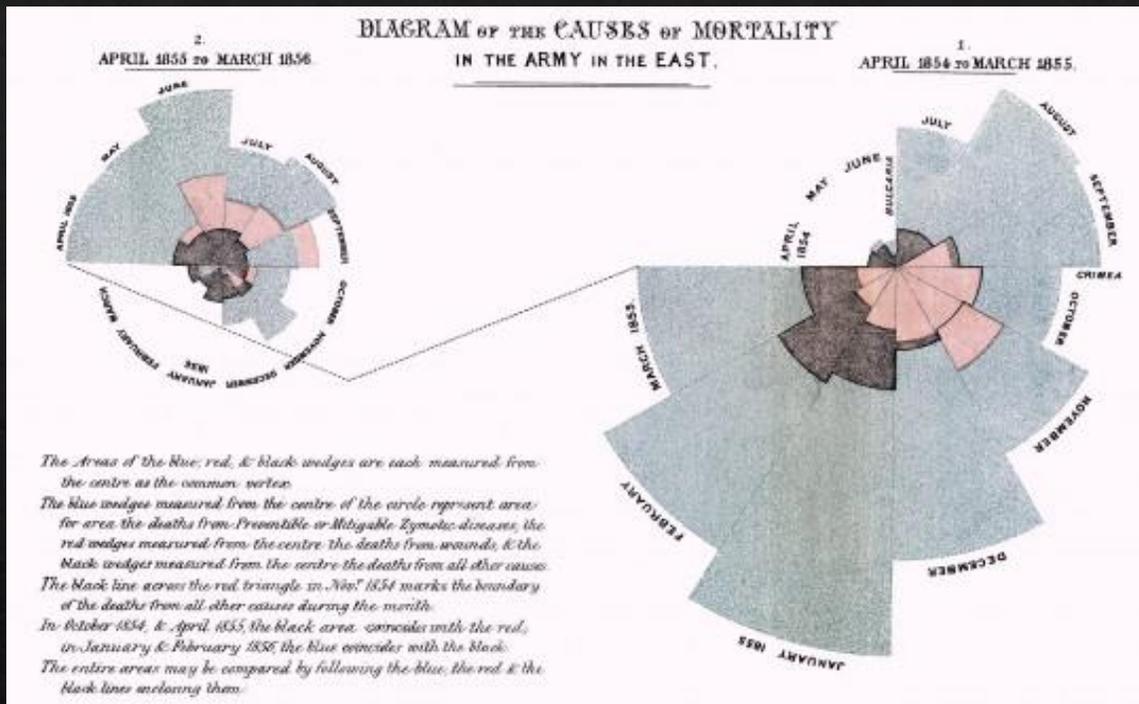

- ◇ ~370 – 415 AD
- ◇ Apollonius of Perga's *Conics*
- ◇ No clear evidences of advances made by her, but rather clarifying and preserving the works of others

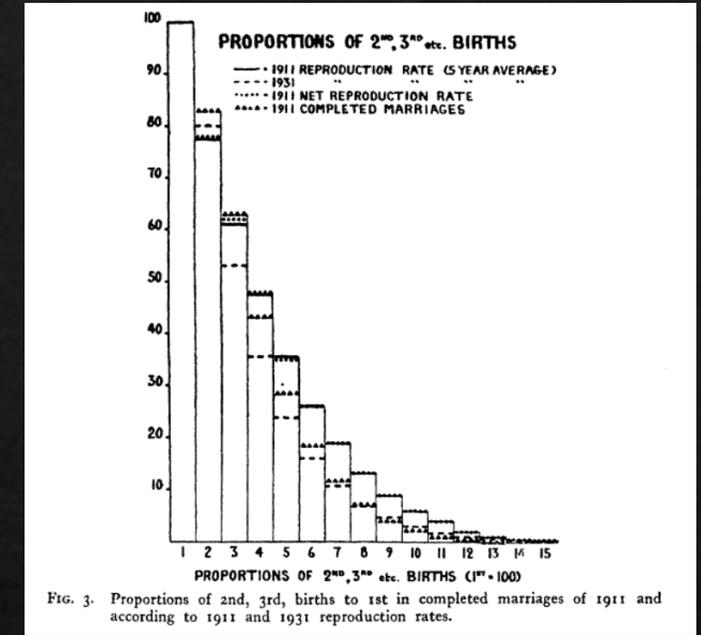

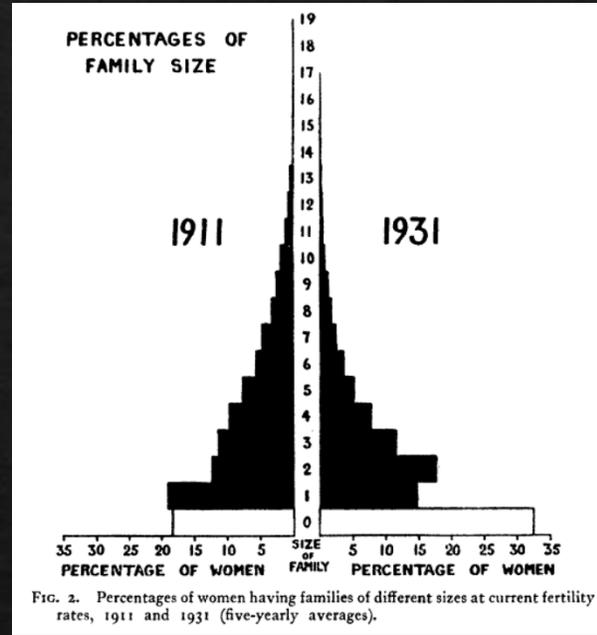

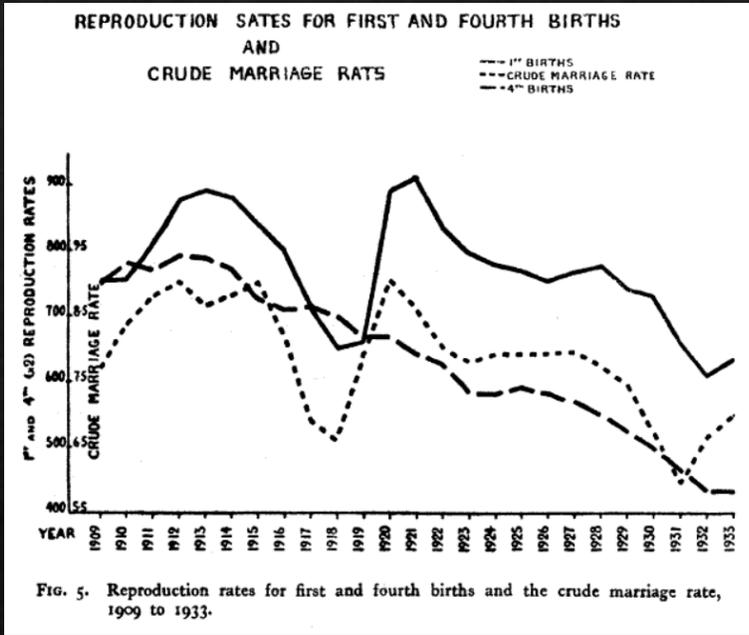

Florence Nightingale

- ◆ 1820-1910
- ◆ Lady with the Lamp
- ◆ Awarded the Order of Merit, first female member of the Royal Statistical Society, namesake of the Nightingale Pledge
- ◆ Social reformer

Coxcomb Chart
 Polar Area Diagram
 Nightingale Rose Diagram
 Circular Histogram

- ❖ Indicates frequency by relative area
- ❖ Each category is represented by a section of the disc with equal angle. The area of each section represents its relative frequency within the population.

Enid Charles

- ◇ 1894-1972
- ◇ Studied fertility rates and nuptiality in Canada, the UK and Australia
- ◇ Activist against Eugenics
- ◇ Health and Population Statistics

Florence Nightingale David (F.N. David)

- ◇ 1909-1993
- ◇ English statistician named after Florence Nightingale
- ◇ Aspired to become an actuary
- ◇ Began working for Karl Pearson
- ◇ Numerous lifetime publications in many aspects of statistics and probability

Pearson's Correlation Coefficient

$$\rho_{X,Y} = \frac{\text{cov}(X, Y)}{\sigma_X \sigma_Y}$$

$$\rho_{X,Y} = \frac{\mathbb{E}[(X - \mu_X)(Y - \mu_Y)]}{\sigma_X \sigma_Y}$$

$$\rho_{X,Y} = \frac{\mathbb{E}[XY] - \mathbb{E}[X]\mathbb{E}[Y]}{\sqrt{\mathbb{E}[X^2] - (\mathbb{E}[X])^2} \sqrt{\mathbb{E}[Y^2] - (\mathbb{E}[Y])^2}}.$$

$$E(X) = \sum_{x_i} x_i P(X = x_i), \text{ When } X \text{ is a discrete random variable}$$

$$E(g(X)) = \sum_{x_i} g(x_i) P(X = x_i), \text{ (} g \text{ is an arbitrary function)}$$

$$E(X) = \int_a^b x f_X(x) dx \quad (a \leq X \leq b), \text{ When } X \text{ is a continuous random variable}$$
